ID	L1- Calc.	Comments	L2-LIFE	Comments	L3- Mem/Simon	Comments	L4 - PONG	Comments	L5 - Quiz Mgr	Comments	Q1	Avg Quiz	Avg Labs	Num Grade	Letter Grade
0195	85	interest rate calc broken; \$180000	98		90	nice beeps; not sure where the actual beep is! Nice code, but NO comments!	100	apologies - great version of Breakout!	90	good doc; leaves the answers last chosen highlighted; didn't follow spec for 3/screen, but good	69	69.3	86.9	88.7	A-
0760	95	worked; error checking; ate the comma	80	saw it, ok	80	saw this too, ok.	75	Needs A LOT of work; no scoring, top paddle really doesn't work; all else is really my code	75	my code; cant recover from Cancel in open file dialog; doesn't display questions; doesn't write file; it just doesn't! Tiny doc in HELP	79	79.2	80.8	80.7	B
0795	85	blew up on \$ - 45000\$	95	simon - 4 colors good; What's PULSAR and where did it come from????	90	simon - 4 colors good; What's PULSAR and where did it come from????	95	Ok doc, perhaps a little more about your algorithm's details! A little choppy as it runs, but it runs correctly. Hard to play 2-player by myself!	89	user doc but no design doc; dies on a File-Cancel; dies if Mult Choice chosen first; dies on reading answers; no comments at all other than mine.	83	82.5	88.3	89.4	A
0816	99	indestructible	95	no timer or horizontal bar for speed control	90	Good job. Would be better if I could reset the timer after a board completes.	90	Adding a score (white-on-white) and generating a sound with every score (which doesn't work), your version improves on 'program faults' the original code had. OK!	95	Good doc; straightforward explanation of the program flow;	79	79.2	90.6	91.4	A
0988	95	it wouldn't let me type! 16000.01	99	rainbow color background	90	doesn't blink on the users' last choice, but good!	97	nice 2 player pong, but not obvious how the 'left' player plays! Great design doc!	79	does not adjust if only 1 or 2 questions left for the TF or MC form; Does not compute result correctly (NaN); NO design doc; Yes, a short user doc; this my code dressed pretty	86	85.8	89.4	91.0	A
1321	90	At long last, the formula is right!	90	Nicely done. A little 'wordy' with respect to all of the IF cases included ... It could be done with a lot less code using a loop	95	I liked the use of red and green to indicate correct or incorrect!	100	An excellent version of Breakout! Nicve doc too! Couldn't ask for more!	100	GREAT doc! 3 parts - fabulous! Perfect ... presented well and according to the specification given!	96	95.7	96.1	95.1	A
1966	95	didn't break; used color	98		93	4 color memory; did NOT follow specification in assignment, though still interesting; Hint: nice touch; Beep: off by one	100	apologies - great version of Breakout!	90	good doc; leaves the answers last chosen highlighted; didn't follow spec for 3/screen, but good	76	75.9	90.8	92.0	A
3256	99	indestructible	99	indestructible	90	Good job. Would be better if I could reset the timer after a board completes.	90	Adding a score (white-on-white) and generating a sound with every score (which doesn't work), your version improves on 'program faults' the original code had. OK!	95	Good doc; straightforward explanation of the program flow;	89	89.1	92.6	93.7	A
3621	0	-unavailabe at deadline	59		59		59		0		66	66.0	36.8	40.5	INC
4322	50	submitted late; broken on Interest	59		59		59		0	orals due 1/31/10	63	62.7	46.1	48.3	INC
6709	70	-unavailable at deadline- Definitely late; done in VB6.0; I had to upgrade it; blew up on a conversion; also cant reproduce the interest rate.	80	As submitted, it doesn't compile. Had to move files around within your directories to get it to compile.	65	Simon - GUI only	85	good Pong doc; you shouldn't design things fixing graphics with constants like 122 pixels. Breakout doc is useless; should be using a common function or a class for all of the B (brick) objects; you have too much code to maintain, and it's so repetitious!	79	my code; cant recover from Cancel in open file dialog; only changed the question file & allowed up to 3 questions/screen; no go-back; no grading; doc is half quiz manager, and half pong! Upgrade Report	69	69.3	73.7	74.7	C
